Season

lower October to middle November 2019

date (conference and seminar)

4 days chained

Time of a day

AM 8:00 - PM 7:00

coming people

about 150 people

About CakePHP

CakePHP was released since 2005 and started using in the world, the framework was become very poplar in Japan. I don't know the reason why official document support Japanese, this is one of the especially point of this framework (mainly of other framework's document is supported by Japanese user group). I guess, the reasons is effect of huge users or active community work. these days, CakePHP is stabled and new programming language or new framework is focused, but CekePHP is historical and constantly used framework.

About CakePHP conference

The name is "CakeFest". CakeFest is held every year in the world, mainly held on Europa or United States, but Japan was chosen first time. CakeFest is international conference for example CakeFest 2017 at NY, not only Europa and USA, but also Nigeria or South Africa or India or more.

Because of CakeFest is non profit conference, the ticket price is lower though International conference. but only conference is about 300USD (early bird ticket). Mainly of CakeFest's cost is meal and venue so we looking for the helpful place about money. CakeFest invite sponsor, but they didn't time for appeal during conference, i feel the sponsor is behind (i only see CakeDC introduction, CakeDC is supported CakePHP and founder works at CakeDC). i think, talking time is spent for sharing knowledge and invention from collecting intelligence. If ticket price was discounted, more easy join CakeFest. So we can give a chance for student as well as developer to shift for international world.
